Solutions for Demanding Applications

Long Reach Flat Panel Arm

This massive arm extends up to 42", allowing for a remarkable amount of flexibility. Combined with more than 28" of vertical range, VT7601-14 allows you to position the monitor anywhere within its huge span. Combined with an optional keyboard tray, this arm makes for a most useful sit/stand data entry station. As with all articulating arms, the monitor floats weightless above the work surface, where it can be effortlessly repositioned. A wide degree of monitor tilt is also featured, even the ability to turn the monitor from landscape to portrait viewing. Cables are threaded through the arm, keeping them out of view and out of harm's way.
